

CLEMENT HAROLD MIGUEL CABUS

Software Developer

09627726970 · clementhmcabus@gmail.com · Taguig City, Philippines · ccabusportfolio.vercel.app

PROFILE SUMMARY

Software Developer with experience building full-stack web, mobile, and game applications across academic and professional settings. Proficient in PHP (Laravel), ReactJS, and MySQL with a strong foundation in RESTful API design and MVC architecture. Experienced in leading development from pre-production to deployment on Heroku, Vercel, and Hostinger. Comfortable working across the stack with additional exposure to Android (Java), TypeScript, Python, and C#.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Java, Python, C#, HTML, CSS, SQL

Frameworks & Libraries: Laravel, ReactJS, Tailwind CSS, Node.js, Phaser.js, Android SDK, Tridium, Niagara

Databases: MySQL, SQL, SupaBase, BQL

Tools & Platforms: Git, RESTful APIs, Heroku, Vercel, Hostinger, AI-assisted development

Methodologies: Agile, Scrum, Waterfall

WORK EXPERIENCE

Junior Software Engineer · Tropical Focus Philippines Inc. · June 2026 - present

- Junior Software Engineer for Tropical Focus Philippines Inc.

Software Developer Intern · CertiCode · February 2026 - May 2026

- Led the end-to-end development of InternTrack — a time-logging and task submission platform for interns, with an admin/supervisor dashboard for monitoring and feedback distribution.
- Built a full-stack system using Laravel (backend) and ReactJS (frontend), hosted on Hostinger.
- Managed the complete development lifecycle from requirements gathering through testing and production deployment.

Technical Support Staff · Commission on Elections · May 2025

- Tasked with helping the Electoral Boards with maintaining and fixing issues faced using the new machines that were deployed during the May 2025 senatorial elections.
-

PROJECTS

Bathala — Video Game · 2026 · TypeScript, Phaser.js, Vercel

Developer · 4th-year Thesis

- Filipino mythology-inspired roguelike card game featuring poker-based combat and deck-sculpting progression.
- Implemented a transparent, rule-based Dynamic Difficulty Adjustment (DDA) system to maintain player flow.
- Deployed on Vercel using TypeScript and the Phaser.js game framework.

vidDownloader · 2026 · Python, yt-dlp, JavaScript

- A video downloader tool leveraging yt-dlp, Python, and JavaScript to enable video retrieval from supported platforms.

InternTrack · 2026 · Laravel, ReactJS, MySQL, Hostinger

Lead Developer · Developed during internship at CertiCode — see Work Experience above.

Barangay Post Proper Southside Information System · 2025 · Laravel, MySQL, Android (Java), Heroku

Lead Developer

- Developed a full barangay information system for Post Proper Southside, Taguig City.
- Designed and built custom RESTful APIs in Laravel hosted on Heroku, serving both a resident-facing Android app (Java) and an admin web application.
- Led a team across the full development lifecycle, including architecture, implementation, and deployment.

HeronNest · 2024 · C#

Developer · 2nd Year Finals Project

- Online Library Management System developed for the University of Makati, built to connect librarians and students for managing library resources and transactions.
- Developed in C# as a 2nd-year finals project.

Calbeans Coffee Web Application · 2023 · HTML, CSS, PHP

Developer · 1st Year Finals Project

- Built a Point of Sale and ordering system for Calbeans Coffee, East Rembo, Taguig City.
- Developed a customer-facing ordering website and an admin panel for inventory management and order processing.

EDUCATION

Bachelor of Science in Computer Science — Major in Application Development

University of Makati · 2022 – 2026

Senior High School

University of Makati · 2020 – 2022
